Im bought this game as pre order and i was playing this game before it goes to steam and i want to tell that in steam version many bugs, glitches are fixed which was the great news for all who wants to buy this game.

so.....

1. Early access so we should not expect the game to be great (FOR NOW)
2. It has a lot of Game modes which is really going to be fun if the game is completed! 8V10

Honestly love the game. it has alot of potental and is amazing for the price. During the pre-alpha, devs are very consistant with updating the game and making it more interesting and fun.

i recommend this game 100%. Poorly optimized, buggy game. Also couldn't locate a setting to change mouse sensitivity.. just garbage dont buy. Just don't.. Do not by this game. No updates so far and gameplay is bad. One of the worst games i ever played.

So BAD 90% !!
